# Cumberland County
# LOCAL ROAD SAFETY PLAN
## IMPLEMENTATION
## YEAR 1 REPORT

March 2026

SJTPO Region
LOCAL ROAD SAFETY PLANS

SafeRoadsSouthJersey.com

# Introduction

The Cumberland County Local Road Safety Plan (LRSP) Steering Committee is pleased to provide this progress report to summarize the state of road safety in Cumberland County and share efforts that have been advanced during the first year of the Cumberland County LRSP's implementation.

This report includes the following:

- Crash trends since completion of the LRSP
- Status of infrastructure project implementation
- Status of behavioral strategies implementation
- Public and stakeholder outreach during Implementation Year 1
- Lessons learned and best practices during Implementation Year 1
- Implementation Year 2 recommendations

We hope that readers will find the information helpful. We thank all who have been a part of this work to date, and we encourage your participation in helping us reach our goal of reducing by half fatal crashes on Cumberland County's municipal and county-owned roads by 2050.

## Cumberland County Local Road Safety Plan Background

With funding assistance and technical support from the South Jersey Transportation Planning Organization (SJTPO), Cumberland County and its municipalities prepared an LRSP to reduce fatalities and serious injuries on all county and municipal roads. Cumberland County's LRSP was adopted by the Cumberland County Board of Commissioners in November 2024. The LRSP identifies priority infrastructure projects and behavioral strategies for implementation by both Cumberland County government and municipal governments through 2029. A copy of the plan is available publicly on the LRSP website at www.saferoadssouthjersey.com.

The LRSP was developed over a two-year period with input from stakeholders and under the guidance of a steering committee comprised of county and municipal government representatives, including engineers, planners, law enforcement, emergency responders, elected officials, and public works managers.

Four emphasis areas were selected to focus project and strategy selection on the greatest opportunities for fatal and serious injury crash reduction. Emphasis areas were selected based on comprehensive data analysis as well as stakeholder input. The Cumberland County LRSP Emphasis Areas are shown below.

During LRSP development, the Steering Committee held multiple meetings to make key decisions. Three in-person stakeholder workshops were held during the LRSP development process to provide an opportunity for input on safety concerns in the county, priority locations, as well as strategies that could be advanced to improve road user behavior.

***Figure 1. Cumberland County Local Road Safety Plan Emphasis Areas***

# Crash Trends

Figure 2 illustrates the year-to-year trend in fatal and serious injury crashes from 2013 through 2023. Crash data is not available for 2024 or 2025. Figure 2 shows that fatal crashes have increased by 30% since hitting a low of 17 in 2019. Serious injury crashes have increased 7% since 2019. Note that serious injury crash criteria were modified in 2019. This accounts for the steep increase in serious injury crashes beginning in 2019.

**Trend since 2019**

- Annual fatal crashes have increased by 30% since 2019.
- Annual serious injury crashes have increased by 7% since 2019.

Note: The LRSP was completed in 2024, using the most recent full year of crash data, i.e., 2021. The 2021 data, however, had not been certified by NJDOT. The 2021 data in the action plan indicated 17 fatal crashes and 67 serious injury crashes in 2021. Since plan completion, certified full-year data for 2021, 2022 and 2023 have become available. Figure 2 includes certified data for all years.

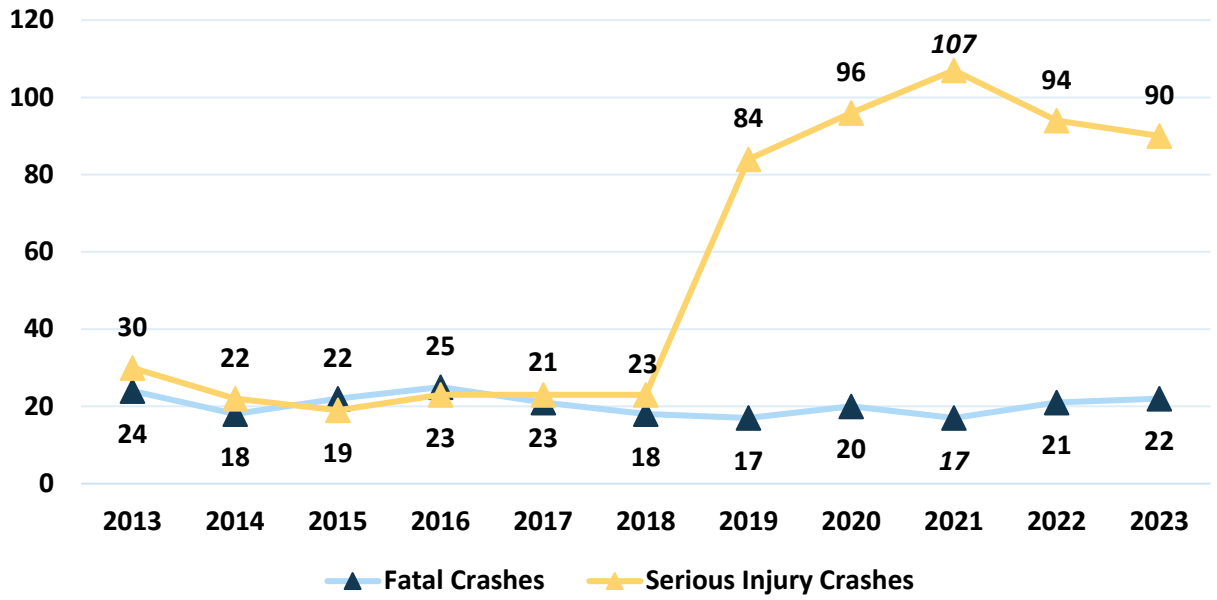

*Figure 2. Annual Fatal and Serious Injury Crashes on County and Municipal Roads*

Figure 3 compares actual fatal crashes with the LRSP goal to reduce half fatal crashes by 2050. Figure 3 uses five-year annual average fatal crashes rather than year-to-year data presented in Figure 2. A five-year annual average helps to normalize anomalies in year-to-year data to provide a better sense of crash trends. Figure 3 shows that five-year average fatal crashes are trending up as of 2023.

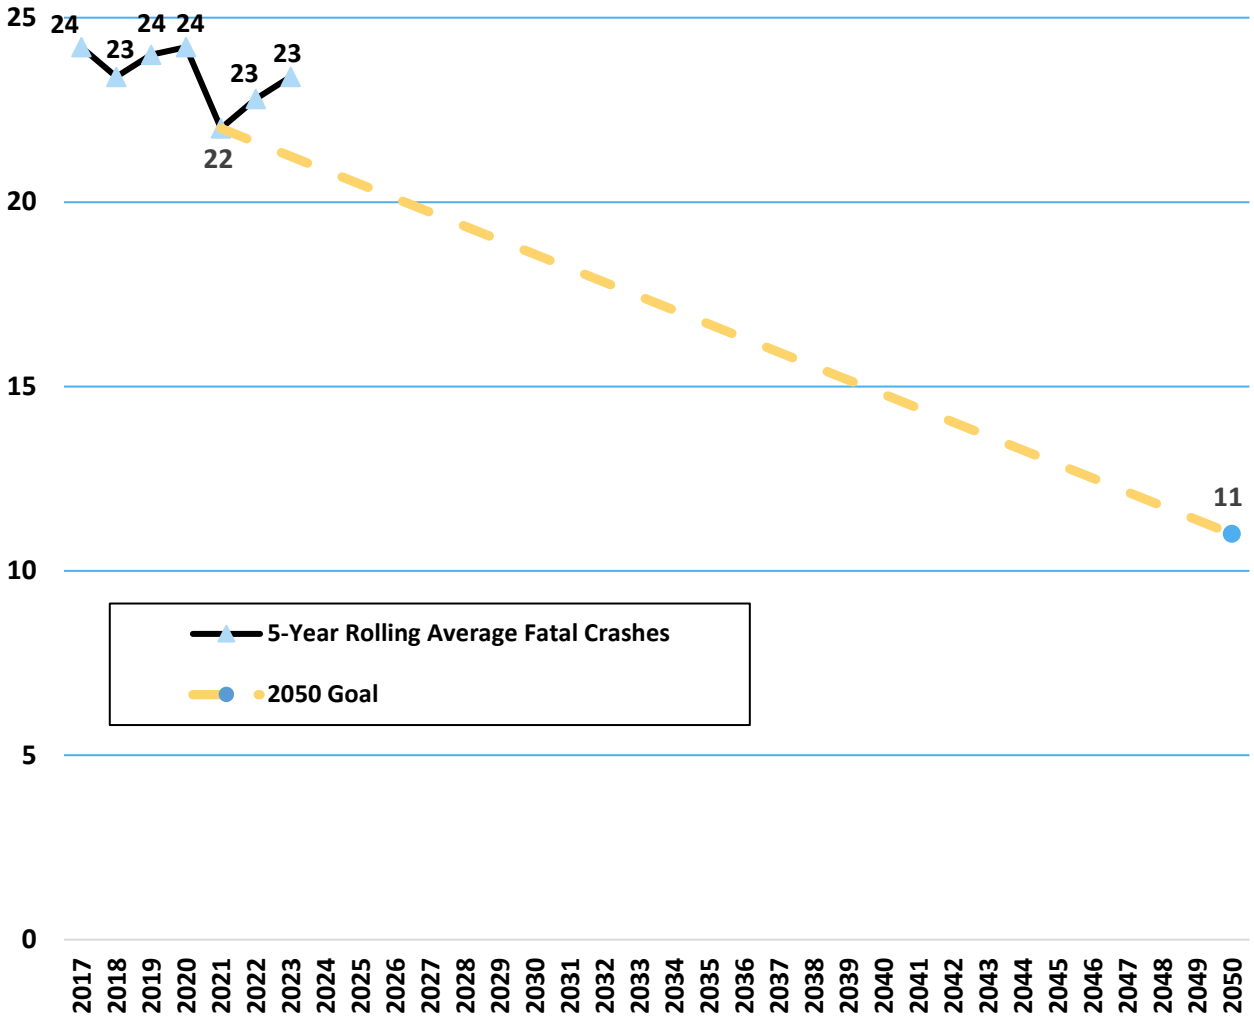

*Figure 3. Fatal Crashes Compared to 2050 Goal (Five-Year Annual Average)*

Figure 4 compares the number of fatal and serious crashes by crash type using data for the nine-year period of 2013-2021. This data was used for the development of the Cape May County LRSP. Lane Departure, Aggressive Driver, Intersection, and Pedestrian/Bicyclists (shaded in blue) are the plan emphasis areas.

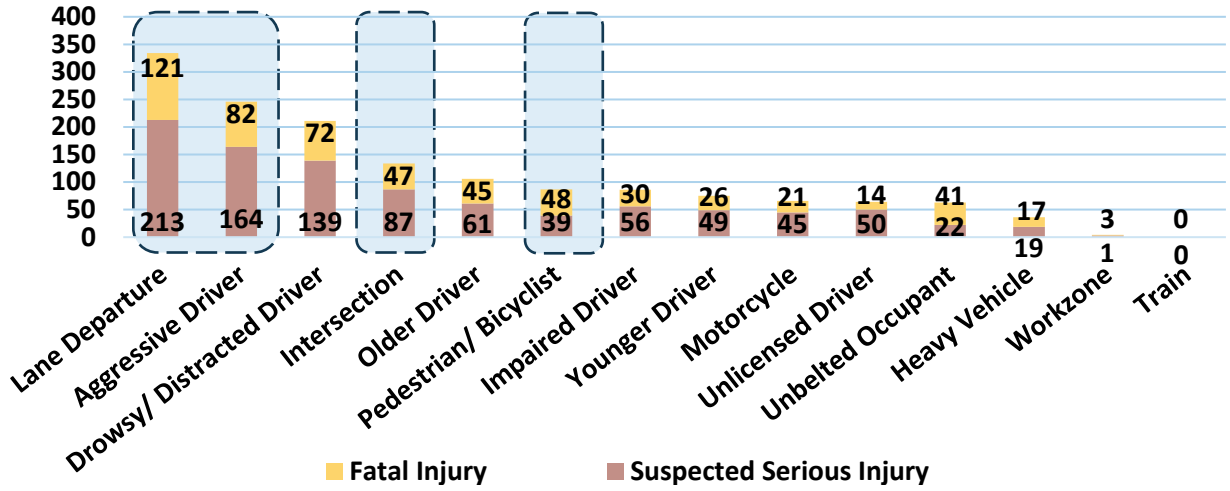

*Figure 4. Cumberland County Fatal and Serious Injury Crashes by NJ 2020 Emphasis Areas (2013-2021)*

Figure 5 provides a similar comparison using data from the latest available, nine-year period, 2015-2023. The primary change from Figure 4 is that Intersection and Pedestrian/Bicyclist had an increase of suspected serious injury.

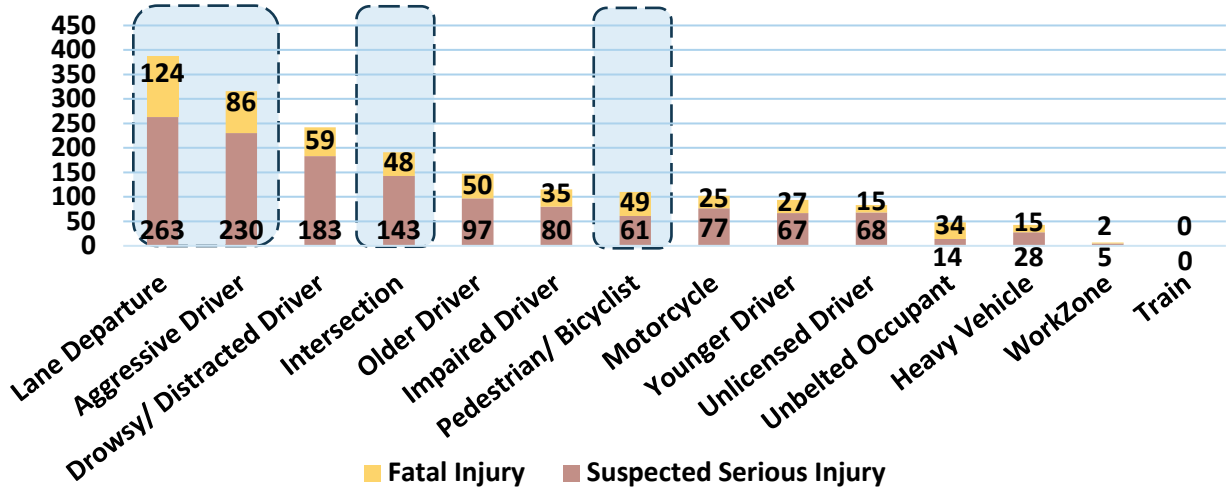

*Figure 5. Cumberland County Fatal and Serious Injury Crashes by Crash Attribute (2015-2023)*

# Infrastructure Implementation Efforts

## Priority Projects on County and Municipal Roads

The following is a list of the priority projects on county and municipal roads and their status as of the end of Implementation Year 1.

| Priority Projects | Status |
|---|---|
| Sharp Street (CR 667), from Columbia Avenue to High Street (MP 0.65-<br>1.65) in Millville City | Advancing in two phases with drainage and roadway improvements. Phase 1 was awarded in January 2026. It includes drainage improvements. Phase 2 includes resurfacing and removal of aluminum pipes. Construction of Phase 2 should take place later this year. |
| Roadstown/Tattletown Jericho Road (CR 626), Casper/Stow Creek Road (CR604) to south of Shiloh Road (CR620), (MP 1.56-2,57) in Stow Creek Township | Construction is ongoing. |
| Mays Landing Road (CR552) from Maurice River-Vineland birder to county line (MP 18.84-21.23) in Maurice River Township | Project will be funded with federal funds. |
| Orchard Road (CR 628) from Sherman Avenue to Elm Road (MP 1.45-2.72) in Vineland City | Not advancing yet. |
| Main Road (CR 555), South of Linda Lane to East Landis Avenue (MP 15.72-16.56) & East Landis Avenue (CR 540), West of CR 555 to East of North South Spring Road (MP 35.71-36.71) in Vineland City | Not advancing yet. |
| North Laurel St (CR606), North Street to south of Laurel Heights Drive (MP 0.32-1.32) in Bridgeton City | Not advancing yet. |
| Install supplementary warning messages at 165 county and municipal intersections and 6” epoxy edge lines on 60 municipal road segments. Locations are provided in the attachment. | Apply for Local Safety Program grant funding when the program becomes available. Include municipal locations as well as noted below. |

In addition, SJTPO developed on-line information webinars to educate municipalities on low-cost infrastructure treatments as well as available funding sources.

# Behavioral Strategies Implementation Efforts

The LRSP Steering Committee established three strategies and specific actions that could be advanced. The following table describes the three strategies, the actions set (priorities in bold), and efforts made by stakeholders in Cumberland County during Year 1 to advance these strategies.

| Strategy | Action | Ongoing Efforts |
|---|---|---|
| **Awareness via Social Media** | Conduct Campaigns leveraging City/Agency webpages<br><br>**Conduct Campaigns leveraging Student Councils/Organizations** | County Public Relations offices, Sheriff's Department, and Municipal Police departments often share safety messages via social media. |
| **Raising Awareness via Public Programs** | **Educate new/young drivers, especially non-English speakers**<br><br>Educate all road users on pedestrian/bicyclist-related laws to increase safety | Millville Police Athletic League (PAL) holds impaired driving simulation for the public at their community events. |
| **Educate through schools** | **Educate young drivers/students about consequences of speeding/aggressive driving**<br><br>Distribute NHTSA educational materials | Millville High School's gym program includes session with goggles that simulate intoxication. |
| **Enforcement** | **High visibility enforcement campaign** | Goal Zero high visibility enforcement initiative being conducted by state police and multiple municipalities statewide. |

# LRSP Public and Stakeholder Coordination Efforts During Implementation Year 1

## Steering Committee Meetings

The Cumberland County LRSP Steering Committee held periodic meetings during Implementation Year 1 to review progress in advancing infrastructure and behavioral strategies. Additionally Steering Committee meetings were used to plan for the Implementation Stakeholder Workshop where progress was shared with stakeholders and their input was gathered.

- Steering Committee meeting 1 was held March 7, 2025. The meeting objectives included setting year 1 goals for infrastructure and behavioral strategies and taking first action steps.
- Steering Committee meeting 2 was held August 27, 2025. The meeting objectives included following up on the infrastructure and behavioral advancements, discussing information resources that would be helpful to municipalities, and planning for the Implementation Stakeholder Workshop.
- Steering Committee meeting 3 was held February 5, 2026. The meeting objectives included reviewing the outcome of the Implementation Stakeholder Workshop and solidifying actions and next steps to advance the LRSP.
- The final Steering Committee meeting 4 was held on March 31, 2026 to share the Implementation Year 1 report.

## Implementation Stakeholder Workshop

A stakeholder workshop was held October 22, 2025. The workshop objective included providing an update to the status of implementation of the Local Road Safety Plan Infrastructure projects and behavioral strategies, and to identify ongoing and potential behavioral related actions that could be implemented. The workshop also included a discussion with attendees on how to sustain plan progress for the next four years.

Key outcomes of the workshop included:

- Sharing infrastructure priorities and status with stakeholders
- Sharing behavioral strategies and actions with stakeholders
- Identifying and capturing ongoing efforts in the county to improve road user safety behavior, some of which align closely with the LRSP priority strategies and actions
- Creating opportunities for increased collaboration by connecting new stakeholders to the LRSP

## Communication with Stakeholders during Implementation Year 1

The project team used newsletters, websites, and social media throughout the year to inform the public and stakeholders of the plan's progress.

# Implementation Year 1 Challenges and Lessons Learned

## Growing and sustaining leadership and participation in LRSP implementation

A continuing challenge with LRSP implementation is keeping stakeholders engaged in the process and enticing them to take on leadership roles. Below are recommendations to improve engagement and ownership of strategies and actions:

1. Consider including LRSP conversations/decision making in conjunction with other committees/meetings.
2. Keep the number of actions manageable.
3. Have a regular, simple progress reporting process.
4. Recognize leaders/volunteers as often as possible.

## Infrastructure Implementation

Implementation of priority safety improvements on municipal roads is a challenge. Municipalities have small transportation infrastructure budgets and often use them for state of good repair paving projects. Other funding sources for county and municipal infrastructure priority projects are available, although they are highly competitive programs.

SJTPO developed two (2) videos to aid municipalities: Infrastructure Implementation and Funding for Safety Improvements. These videos are available at https://www.youtube.com/channel/UCzdoMUOQ4-umcnlWB5lCxGQ

## Behavioral Strategy Implementation

Due to lack of funding and staff, municipalities are often not able to engage in road user behavior improvement initiatives. We recommend engaging school districts as an alternative.

SJTPO developed two (2) videos that can be valuable to municipalities: Behavioral Strategies Implementation and Funding for Safety Improvements. These videos are available at https://www.youtube.com/channel/UCzdoMUOQ4-umcnlWB5lCxGQ

# Implementation Year 2 Priorities

## Infrastructure Priorities

- Sharp Street (CR 667) safety improvements from Columbia Avenue to High Street in Millville.
- Roadstown/Tattletown Jericho Road (CR 626) from Casper/Stow Creek Road (CR604) to south of Shiloh Road (CR620) in Stow Creek.
- Apply for Local Safety Program funding for a systemic project to install.

## Behavioral Strategies and Action Priorities

- Engage the school superintendents to make them aware of the plan and solicit their participation.
- Distribution of NHTSA educational materials to schools.
- Engage non-English speakers.
- Advancing positive reinforcement/rewards for children who practice safe road user behaviors, such as wearing a bicycle helmet.

## Sustaining Leadership and Participation

- The Steering Committee agreed to meet twice each year to review progress of infrastructure priorities as well as behavior strategies.
- The Steering Committee agreed that having a road user behavior champion would be advantageous to advancing behavior related strategies.
- The Steering Committee agreed that committee members should be added to represent entities that can influence road user behavior, such as law enforcement/police chiefs, school administrators/superintendents, the local health department, as well as youth organizations such as the Police Explorers.
